EPA SEEKS COMMENTS ON ALBION-SHERIDAN SITE; PUBLIC MEETING OCT. 5

U.S. Environmental Protection Agency (EPA) Region 5 is seeking public comments on a proposed cleanup plan for the Albion-Sheridan Township Landfill Superfund site, Albion, MI.

EPA has recommended a group of alternatives to address the site's four areas of concern. The alternatives are: the removal and off-site disposal of hazardous and liquid waste drums; a flexible membrane liner cap; an active collection and flaring of landfill gas; and groundwater monitoring.

Written comments on the proposed plan will be accepted from October 3 until November 2, 1994. EPA will make a final decision after considering all comments received. A decision document outlining the selected cleanup method and responding to public comments will then be released.

EPA will accept written and oral comments on the proposed plan during a public meeting at 7 p.m., October 5, Albion Public Library, 2nd Floor Meeting Room, 501 S. Superior St. All other comments must be postmarked by November 2, 1994, and
